INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

(Chapter I of the Patent Cooperation Treaty)

(PCT Rule 44bis)

Applicant's or agent's file reference 1037-151PCT	FOR FURTHER ACTION	See item 4 below		
International application No. PCT/CA2006/000502	International filing date (day/month/year) 06 April 2006 (06.04.2006)	Priority date (day/month/year) 06 April 2005 (06.04.2005)		
International Patent Classification (8th edition unless older edition indicated) See relevant information in Form PCT/ISA/237				
Applicant TIR SYSTEMS LTD.				

This international preliminary report on patentability (Chapter I) is issued by the International Bureau on behalf of the International Searching Authority under Rule 44 bis.1(a).

2.	This REPORT consists of a total of 7 sheets, including this cover sheet.			
	In the attached sheets, any refere to the international preliminary re	nce to the written opinion of eport on patentability (Chapte	the International Searching Authority should be read as a reference er I) instead.	
3.	. This report contains indications relating to the following items:			
	Box No. I	Basis of the report		
	Box No. II	Priority		
	Box No. III	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability		
	Box No. IV	Lack of unity of invention		
	Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement		
	Box No. VI	Certain documents cited		
	Box No. VII	Certain defects in the inter	national application	
	Box No. VIII	Certain observations on the	e international application	
4.	4. The International Bureau will communicate this report to designated Offices in accordance with Rules 44bis.3(c) and 93bis.1 but not, except where the applicant makes an express request under Article 23(2), before the expiration of 30 months from the priority date (Rule 44bis.2).

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/CA2006/000502

Bo	x No	o. I	Basis of this opinion
1.	Wit	h re	gard to the language, this opinion has been established on the basis of:
	[X) t	he international application in the language in which it was filed
	[translation of the international application into , which is the language of a
		t	ranslation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)).
2.			gard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed on, this opinion has been established on the basis of:
	a. 1	type	of material
		[] a sequence listing
		Į] table(s) related to the sequence listing
	b. :	forn	at of material
		[] on paper
		[] in electronic form
	c.	time	of filing/furnishing
		[] contained in the international application as filed.
		[filed together with the international application in electronic form
		[] furnished subsequently to this Authority for the purposes of search.
3	[n addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has
		l t	seen filed or furnished, the required statement that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/CA2006/000502

Box No. V	Reasoned statement u		3bis.1(a)(I) with regard to novelty, inventive steting such statement	p or industrial applicability;
1. Statement				
Nove	lty (N)	Claims	7-10, 12, 18 and 20 - 22	YES
		Claims	1 - 6, 11, 13 - 17, and 19	NO
Inven	tive step (IS)	Claims	9, 12 and 18	YES
		Claims	1 - 8, 10, 11, 13 - 17, and 19 - 22	NO
Indus	trial applicability (IA)	Claims	<u>1 - 22</u>	YES
		Claims	NONE	NO

2. Citations and explanations:

D1 US 5758951 B (HAITZ, R.H.) 02 June 1998 (02-06-1998) **D2** GB 2365112 A (BIGLIATI, C. et al.) 13 February 2002 (13-02-2002)

Document D1 (HAITZ, R.Z.) discloses a lighting module comprising: two or more light emitting element emitting a white, blue, and red light and positioned into a closely packed array, a primary optical system with means for light extraction, and a secondary optical system for mixing and collimating the extracted light and connected to said primary system. The spacing between two light emitting elements is less than a half of the longest dimension of light emitting elements. Both optical elements are a beam shaping elements. The axial cross sectional shape flares at an exit aperture.

Document **D2** (BIGLIATI, C. at al.) disclose a lighting module with light emitting elements, wherein a primary optical system is formed from an encapsulated material.

NOVELTY:

Claims 7 to 10, 12, 18, and 20 to 22 are novel and do comply with Article 33(2) of the PCT. None of the prior art documents discloses a lighting module with light emitting elements positioned into closely packed array and including two optical systems, wherein a primary optical system is formed from encapsulation material, and a secondary one includes a diffusive optical element and a light pipe or light guide.

Claims 1 to 6, 11, 13 to 17 and 19 are not novel and do not comply with Article 33(2) of the PCT. Document D1 disclosed the claimed subject matter before the claim date.

INVENTIVE STEP:

Given the above objection, claims 1 to 6, 11, 13 to 17, and 19 are also considered to lack an inventive step in light of the described prior art and thus fail to comply with Article 33(3) of the PCT.

Claims 7, 8, and 10 do not comply with Article 33(3) of the PCT. The subject matter of these claims would have been obvious to a person skilled in the art or science to which they pertain, having regard to D1 in view of D2 would have been obvious to a person skilled in the art to improve the lighting module of (D1) by applying a commonly known solution shown by D2

WRITTEN OPINION OF THE

International application No. PCT/CA2006/000502

Box No. VII Certain defects in the international application		
The following defects in the form or contents of the international application have been noted:		
The drawings in the application do not comply with PCT Rule 11.13 (e). All numbers, letters, and reference lines appearing on the drawings shall be simple and clear.		
The drawings in the application do not comply with PCT Rule 11.13 (f). All lines in the drawings shall be drawn with the aid of a drafting instruments.		

WRITTEN OPINION OF THE

International application No. PCT/CA2006/000502

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question

Claims 9 and 13 do not comply with PCT Article 6.

The expression "positioned between the two more..." (claim 9) is ambiguous in meaning and scope.

The second introduction (use of an indefinite article) of an element already introduced causes ambiguity. The term "a reflective element" (claim 13) has been defined previously in the claims. The aforementioned term should therefore be referred to using a definite article.

The description does not comply with PCT Article 6. A statement, such as found on page 31, paragraph 00154, which implies that the protection sought may be extended to cover the "spirit" of the invention, should be removed.

WRITTEN OPINION OF THE

International application No. PCT/CA2006/000502

Supplemental Box

In case the space in any of the preceding boxes is not sufficient.

Continuation Box V

Claims 20 to 22 do not comply with Article 33(3) of the PCT. The subject matter described and claimed in this application, of these claims would have been obvious to a person skilled in the art or science to which they pertain, having regard to D1 in view of common knowledge. Multiplying optical systems is a commonly known practice in the art of lighting and adding just additional one cannot be considered inventive.

Claims 9, 12, and 18 do comply with Article 33(3) of the PCT. The subject matter of these claims is considered to involve an inventive step since the prior art does not fairly suggest a lighting module with light emitting elements positioned into closely packed array with a primary optical system further comprising an encapsulation material positioned between the two light emitting elements and with a secondary optical system including a light pipe or a light guide.

INDUSTRIAL APPLICABILITY:

The subject matter of claims 1 to 22 is considered to be industrially applicable and thus complies with the requirements Article 33(4) of the PCT.
